Baron, 1618.

A Prognostication, for the
yeare of our Lord GOD,
1618. beeing second
from the Leape yeare.

Wherein is set forth the Disposition of the
four quarters of the yeare, the inclination of
the weather, for euery full, Change, and
Quarter of the Moone, throughout the
yeare, Generall Abstracts for each
Moneth in the Yeare.

The rising and setting of the Sunne, with
the length of the Planetary houre. And
something else worth the noting.

All which things aboue-writtē, any Christian
man may make a religious obseruation of,
withour any Superstitious vse at all.

Made & set forth, according to law-
ful Art, by Gr Burton, of Wymondham,
in the Countie of Norfolke, Pra-
ctitioner of Physicke, and the
Arts Mathematicall. &c.

Genesi: ch: 1. vers. 14. And God said, &c.
And let them be for signes & for seasons, &c.
Astra caue spernans, vitā qui ducis ab Astris.

Printed at London, for the
Company of Stationers.

TO THE RIGHT WOR-
shipfull, and his very good Friend,
Mr. *John Minge* : Mayor
of *Norwich*.

Orshipfull Sr, hauing for
some yeares passed, writtē
and set forth a *Common Al-*
manacke and *Prognosticat-*
on, & now not altering my
courte, but more especially
applying it, to the *Meridian* of the ancient
and famous Citie of *Norwich*, of the which
you are for this present yeare, by publicke
voyce elected Mayor; Wherevpon it came
to my minde, to bestow vpon you, this my *Al-*
manacke and *Prognostication*, penn'd after
my simple skill for this yeare, not of value
to enrich you, but to giue you an euident
testimony of our mutuall loue, and to grati-
fie you, for that good esteeme you haue be-
flowed vpon mee, in my profession, (where-
in I confesse my owne weakenesse) and in
some sort to grace that laudable mistery or

THE EPISTLE.

profession (sympathising with that wherein
I liue) in the which you haue to your great
commendations, spent the most parte of
your former yeares; accept (good S^r.) as a
band, further to increase and vnite our for-
mer loue: and so beseeching God, euer to
blesse and keepe you, that through his assi-
stance, you may with wisdom and discreti-
on, rule and gouerne in that high place of
Authoritie, wherein it hath pleased God,
and your Companie, for this present
yeare, to Elect and place you,
And thus I heartily take my
leauē. *Wymundham.*

May. 12. 1617.

Your Worships

ouer louing Friend,

whilst liuing.

Gre: Burton.

¶ A brieſe Deſcription of the
ſtate and qualitie of the
four Quarters of
this Yeare.

And firſt of Winter.

The Hyemall or Winter quarter beganne with
vs, the 12. day of December laſt paſt, at 3. of the
clock, and 30. minutes in the morning, and la-
ſteth whileſt the Sunne continueth his courſe thro-
ugh theſe 3. Signes, vid. *vp. xx. x.*

This part of the Yeare is likely to procure colde
and moiſt, according to his naturall Inclination:
the firſt part more colde and moiſt, the latter parte
more ſharpe and freeing .&c.

The Diſeaſes likely to raigne amongſt vs this
Quarter, are ſtrange Agues, Catharres, Coughes,
Rheumes, Head-ache, paine in the Knees, and
Soyuts, &c.

¶ A Prediction of the Spring.

The Spring time, or Vernall part of this yeare,
beginneth the 11. day of March, at 6. of the
clocke, and 45. minutes in the forenoone, and
continueth whileſt the Sunne runnes through V.
8. and II.

The firſt part of this ſpring may procure more colde

A Prognostication.

and dry (then wished,) the second parte more temperate and Spring-like weather. &c.

The diseases of this Quarter will be paines in the head, sore Eyes, flushings by into the head and face, by reason of too much heat of the inward parts, hote Agues of many kinds, Pluresies, the vntemperatenesse of the seasons, doe signifie the Pore, or Plague to follow, &c. Let vs amend our liues, and make our prayers vnto G D D, to diuert and turne his punishments from vs.

A Prediction of Summer.

The Astiuall or Summer Quarter beginneth with vs, the 12. day of June, at 2. of the clocke, and 44. minutes in the morning, and continueth whilst the Sunne passeth through these three Astiuall signes, ϑ , ζ , and η , &c.

The condition of this Quarter will be somewhat altered (as I thinke) from his naturall inclination, and will proue somewhat windie and wet at times, or else I am much deceyued, as many men are sometimes in things, much more neerer vnto them, &c.

The ordinary maladies of this Quarter, are Pestilent and hote burning Feauers, paine in the head, Freneticall passions, Jaundies, paines in the Eyes, with other diseases, caused by corrupted and inflamed blood, &c.

Autumnes Prediction.

The Autumnall or Haruest Reuolution, beginneth the 13. day of September, at 2. of the clock in the after-noon, & lasteth till the sunne passeth through these three Autumnall signes, ν , μ , and τ .

The first part of this Quarter colde and drye:

the

the second part more windie and wet.

The sickneses of this Quarter, are likely to be Quartaine Agues, paine in the armes, and shoulders, Coughes, Lamenesse in the ioyntes, fluxes, Batties, Consumptions, with some other troubles. God send good helpe in due time, &c.

¶ An aduertisement to all those
that shall haue neede to
take Physicke.

First, chuse a Physitian that is Learned, honest, and happy in those things he takes in hand, who is able to make choyle of Times and Signes, for Bleeding and purging, and of Medicines, and other things fitting, and agreeable to euery mans seuerall disease, Complexion, and Constitution, and then through the blessing of God, you shall doe well (feare it not) for these men neede no aduertisement here, being sufficiently learned and instructed before.

Secondly, you are to take heede, (it is an olde saying, that take heede is a good warning) that you refuse the helpe or aduise of all sortes of Empericall Dogge-leaches (whatsoever) as greater hurte to the Patient then the disease it selfe: a word to the wise is sufficient, &c.

¶ Briefe Obseruations
for Husbandrie.

Sowe or sette Seedes, after the Change, the 8.
being in δ , ζ , η , or ν . in a Δ , or \ast . of H .

A Prognostication.

4. or ♀, &c.

Grasse or Plant, the C. in 8. or ∞ . in the like Aspects as before.

Plash Hedges, loppe Trees for fying, the C. increasing, in V. or ∞ . in a \star . or Δ . of 4. or ♀.

Cutthaire the better to growe, the C. in 8. or ∞ . increasing, in a Δ . or \star . of 4. or ♀.

Sheare your sheepe in the like Configuration as before.

Hold Cattell, the C. decreasing, in V. 7. or w.

Destroy Cornes, Wennes, Warts, or haire, the the C. decreasing, and in a 6. \square . or 8. of h, or 8. .

A generall Prediction of the wea-
 ther for euery quarter of the Moone,
 in each Moneth throughout this
 Yeare, the time of Sunne-rise,
 and Sunne. sette, with the
 length of the Plane-
 tary houres, and al-
 so profitable Ab-
 stracts,
 Apertaining to each
 moneth through-
 out the yeare.

¶ Ianuarie. 1618.

The first day, the Sunne riseth at 8. & setteth at
 4. the length of the Planetary houre is 40. min.
 Last quarter the 8. day, at 7. and 28. minutes at
 night: Cold sleety weather, if not some snow.

The 10. day, the sunne riseth at 8. and 52. minutes,
 and setteth at 4. and 8. minutes. The length of the
 Planetary houre is 42. minutes.

325

A Prognostication.

New moone the 16. day, at one of the clocke in the afternoone : the Sunne then Eclipsed, windy and wet weather likely to follow.

The 20. day, the Sunne riseth at 7. and 36 min: and setteth at 4. and 24. min: The length of the Planetary houre is 44. minutes.

First quarter the 23. day, at 8, and 12, minutes in the forenoone, likely to be windie and wet.

Full Moone the 30. day, a little before 2. in the after noone, frosty weather, with some snow towards the last quarter.

Ianuarie Abstract.

In this moneth vse little Physick, nor bleed, except bygent occasion prouokes you thereunto: and then by the counsel of the learned, letting Women, swizards, and Dogge-leaches goe, White wine is good to drinke fasting, for them that may haue it, for beare supping late, you that are Rheumaticque, and beware taking colde, on head or feet: this moneth you may sette most kinde of Fruite trees, with other Quicke sets, in the new of the Moone, the winde and weather repeated.

This moneth is good to sette Pease, Parseneps, Beanes, and Onyons, if the weather proue milde, and the moone decreasing, &c.

Februarie. 1618.

The first day, the Sunne riseth at 7. and 16. minutes, and setteth at 4. and 44. minutes: the length of the Planetary houre is 47. minutes.
Last Quarter, the 7. day, at 3. in the afternoone,
cold

cold and wet weather, but sharpe frosts are like to follow.

The 10. day the sunne riseth at 7. and setteth at 5. the length of the planetary houre is 50. minutes.

New Moone the 15. day, at 4. and 23. minutes, in the morning, cleete weather, if not some snow, or frosts, towards the latter part of the Quarter.

The 20. day, the sunne riseth at 6. a clocke, and setteth at 4. and 18. minutes.

The length of the Planetarie houre is 54. min.

First quarter the 21. day, at 4. and 14. minutes in the afternoone, windie and wet weather followeth.

Februaries Abstract.

Bleede not, nor take Physick, except before excepted, elschew all stumpy meats, as salt fish, Milke, and such like: Beware of taking coide, for feare you be infected to say (had I will:) You may set Roses and all other Plants, cutte Quicksets or the like. Sow Pease and Onyons, as in the moneth before. This moneth good Houswifes will be busie in theyr Gardens (prouiding coole hearbs for sallets, to allaye the heate of theyr Husbendes choller, which otherwise will shew it selfe, in them that have shewes to their Wines: For good reason it is that they that make the wound, should prouide the salue,) Also let them be prouiding of Pothearbs for the time following, &c.

March. 1618.

The first day, the Sunne riseth at 6. and 18. minutes, and setteth at 5. and 41. minut.

The

A Prognostication.

The length of the Planetarie houre is 47. minutes.

Last Quarter the 9. day, at 10. and 22. minutes in the fore-noone, the first part colde and drye, the second part more shyewie and wet.

The 10. day the Sunne riseth at 6. and setteth at 6. The length of the Planetarie houre is 1. houre.

New Moone the 16. day, at 10. and 48. minutes before noon, that time somewhat drye, but the latter part of this quarter, more sprung-like weather.

The 20. day, the Sunne riseth at 5. and 40. minutes, and setteth at 6. and 20. minutes.

The length of the Planetarie houre is 1. houre and 4. minutes.

First Quarter the 23. day, at 2. in the morning: sprunglike weather followeth, &c.

Full Moone the 30. day, halfe an houre past 8 11. at night: windy and wet weather for the most part.

Marches Abstract.

Feede moderately, and of meates of good digestion, such as may ingender good blood: Purge, Bathe, or Bleede, as neede shall require, eyther to prevent, or helpe diseases.

In the new of the Moone, Graffe, set quick sets, and Gines, cutte your Hedges and Tynes, you may sowe Oymys, Beanes, Dates, and all manner of Garden-seedes, &c.

April. 1618.

The fyrst day, the Sunne riseth at 5. and 18. minutes, and setteth at 6. and 42. minutes.

The

Burton. 1618.

The length of the Planetary houre, is 1. houre, and 8. minuts.

Last Quarter the 8. day, at 1. and 8. minuts, in the morning: Fine springlike weather. &c.

The 10. day, the sunne riseth at 5. and 2. minutes, and setteth at 6. and 38. minuts: the length of the Planetary houre is 1. houre and 10. min.

New Moone the 14. day, at 7. and 12. minuts, at night, the weather much like as before.

The 20. day, the sunne riseth at 4. and 42. minutes, and setteth at 7. and 18. minutes.

The length of the Planetary houre, is 1. houre, and 14. minutes.

First Quarter the 21. day, at 1. and 46. minutes past noone, more dyle then wet, especially the first part of this quarter.

Full Moone the 29. day, at 4. and 4. minuts past noone, April showers distilling.

Aprils Abstract.

Now is a fitte thne to take Physicke, for them that haue need, eyther to cure diseases, or to prevent insuing sicknesses: let Artichocks, pole pour Hoppes, sowe Barley, barke trees for Tan-ners, sowe Hempe and Flax: let Cithrones, Mel-lones, and Cucumbers, with summer-heards flourish your Gardens, &c.

Maye. 1618.

The first day, the Sunne riseth at 4. and 22. min. and setteth at 7. and 38. minutes.

The

A Prognostication.

The length of the Planetary hours is 1. and 16. minutes.

Last quarter the 7. day, more then halfe an houre past 12. at noone, somewhat windie and wet.

The 10. day, the sunne riseth at 4. and 12. minuts, and setteth at 7. and 48. minuts. The length of the Planetary houre is 1 and 18. minuts.

New Moone the 14. day, at 3. in the morning the weather much like as before.

The 20. day, the sunne riseth at 4. and setteth at 8.

First quarter the 21. day, at 3, and 40. minuts in the morning, some fall of Raine, but the latter part more dry, &c.

Full Moone the 29. day, at 7. and 12. minutes in the forenoone, weather besitting the time.

Mayes Abstract.

Rise betimes in the morning, & beholde the beautie of the fieldes, but not fasting : Drinke woorme-wood-wine or Beers next your heart : Clarified whay, with coole hearbes (if there be neede) is not amisse. You may yet Bleed, Bache, or purge, as occasion byge, &c.

Now is a fitting time to sow the seedes of Summer hearbes, which would not well endure the colde of the fore-passed moneths : You may yet sow Henpe and flaxe, Weede your Hoppes, and take away all superfluous Branches from your Grasses, &c.

June 1618.

The first day, the Sunne riseth at 3. and 50. min. and setteth at 8. and 10. minutes.

The

The length of the Planetary houre is 1. houre,
and 22. minutes.

Last Quarter, the 5. day, at 7. and 20. minutes at
night, likely to be windy and somewhat wet, &c.

The 10. day, the sunne riseth at 3. and 46. minutes,
and setteth at 8. and 14. minutes.

The length of the Planetary houre is 23. minutes

First Moone the 12. day, at 10. and 56. minutes,
before noone, mostlie disposed.

First Quarter the 19. day, at 7. and 20. minutes
at night, cloudy and hote weather.

The 20. day, the sunne riseth at 3. and 49 minutes,
and setteth at 8. and 11. minutes.

The length of the Planetary houre is 1. and 22.
minutes.

Full Moone the 27. day, at 8. and 41. minutes at
night, hote and drye weather follooweth.

Iunes Abstract.

VSe thinne & slender Dyet, (I advise not those
that are in want.) drinke clarified Whay (you
that haue hote Lpuers) with coole hearbs, in-
dure not too much thyself, drinke no hote Wines: if
necessitie inforce you to vse Physicke, let it be by the
counsell of the Learned: Gather your hearbes to
keepe drye for all the yeare, about the Full Moone,
Weede your Cozne and Gardens, set Rosemary, and
Gilly-flowers, sowe Lettice, sheare your sheepe, you
that haue them.

The first day, the Sunne riseth at 3. and 56. mi-
nutes, and setteth at 8. and 4. minutes.

The

A Prognostication.

The length of the Planetary hours, is 1. houre,
and 21. minutes.

Last Quarter, the 5. day, at 1. and 46. minutes,
in the morning, hote and drye weather.

The 10. day, the sunne riseth at 4. and 7. minutes,
and setteth at 7. and 53. minutes. The length of the
Planetary houre is 1. houre and 19. minutes.

New Moone the 11. day at 7. and 55. in the after-
noone, the weather much like as before.

First Quarter the 19. day, at 12. and 12. minutes
afternoone, likely to rayne.

The 20. day the sunne riseth at 4. and 20. minutes
and setteth at 7. and 40. minutes.

The length of the Planetary houre, is 1. houre
and 17. minutes.

Full Moone the 37. day, at 8. and 36. minutes in
the forenoone, likely to be windy and wet.

Iulys Abstract.

Forbear to feed vpon meates of hard Digestion,
Use Physicke as in the other moneth last before.
Take heede and beware of euill and corrupted
Ayre.

Turne idlenesse out of your Hay-meadowes, as
an enemye to the time following, &c.

August. 1618.

The first day, the Sunne riseth at 4. and 40. min:
and setteth at 7. and 20. minutes.

The length of the Planetary houre, is 1. houre,
and 14. minutes.

Last quarter the 3. day, at 6. and 12. minutes in the

morning, windy, and somewhat inclined to Rayne.

The 10. day, the sunne riseth at 4. and 55. minutes and setteth at 7. and 5. minutes.

The length of the Planetary, is 1. houre, and 11. minutes.

New Moone the 10. day, at 6. and 50. minutes in the morning, some intermixt weather followeth.

First quarter the 18. day at 5. and 50. min. in the morning, indifferent faire weather.

The 20. day the sunne riseth at 5. and 15. minutes, and setteth at 6. and 45. minutes.

The length of the Planetary houre, is 1. houre, and 8. minutes.

Full Moone the 26. day, at 7. and 28. minutes at night, a little inclinable to rayne.

Last Quarter, the 31. day, at a 11. and 24. minutes at night, drye and windy weather.

Augusts Abstract.

BEware of sudden heates and coldes, for they will breede Agues, and Fluxes: Sleepe not after meate in the day time.

You may vse Physicke towards the latter parte of this moneth, by good direction.

You that will Feast at Christmas, see your busines goe forwards in Haruest.

Sowe seedes for Winter-hearbs: Gather those seedes that were not ripe the moneth before, &c.

A Prognostication.

September. 1618.

The first day, the Sunne riseth at 5, and 3⁸. minutes, and setteth at 6, and 22, minutes.

The length of the Planetary houre, is 1. houre and 4, minutes.

Neuwe Moone the 8. day, at 8, and 12, minutes at night, Windie and indifferently drye.

The 10, day, the Sunne riseth at 5, and 55. minutes, and setteth at 6, and 5. minutes.

The length of the Planetary houre is 1. and 0. minutes.

First Quarter the 16. day, at 11. and 23. minutes at night, Windie and wette weather followeth.

The 20. day, the Sunne riseth at 6. and 14. minutes, and setteth at 5. and 46. minutes.

The length of the Planetarie houre is 58. minutes.

Full Moone the 24. day, at 4. and 47. minutes in the morning. The first part of this Quarter colde and dry, the second part windy and wet.

Last Quarter the 30. day at 7. and 9. minutes at night, wet weather followeth.

Septembers Abstract.

Vs: Physicke this Moneth, as occasion shall be offered, refusing the Counsell of any
(He=

(Mechanicall bystart) Woman, or Witch, what-
soever.

Now is a fitt time to sette Artichokes. Sow
seedes for Winter-herbs. Cut Quicklets. Ga-
ther Apples, and other fruite then to be gathered, a-
bout the full of the Moone : as also your Crabbes,
for Meriuyce : It is now time to sow Wheate
and Rye, &c.

October. 1618.

The first day, the Sunne riseth at 6. and 36. mi-
nutes, and setteth at 5. and 24. minutes.

The length of the Planetary houre is 54.
minutes.

New Moone the 8. day, at 12. and 13. minutes, af-
ternoone, disposed to rayne, &c.

The 10. day, the Sunne riseth at 6. and 54. minutes,
and setteth at 5. and 6. minutes.

The length of the Planetary houre, is 51. mi-
nutes.

First quarter, the 16. day, at 4. and 18. minutes
afternoone, windie and vnconstant weather.

The 20. day, the Sunne riseth at 7. and 11. min.
and setteth at 4. and 49. minutes.

The length of the Planetary houre is 48. mi-
nutes.

Full Moone the 23. day, at 2. and 16. minutes
after noone, somewhat windy and wet, &c.

Last Quarter, the 30. day, at 6. and 26. minutes,
in the morning : weather sitting the time.

A Prognostication.

Octobers Abstract.

Drinke sweete and good Wines, you that haue wherewithall. To take colde on head or feete is hurtfull, and may cause many troubles: as Poles, Rheumes, and such like: In the new of the Moneth remove your young Trees, and about the full, gather your Winter-fruit-drye. Sette Accoznes with all kindes of other Duties, &c.

Nouember. 1618.

The first day, the Sunne riseth at 7. and 32. minutes, and setteth at 4. and 28. minutes.

The length of the Planetary houre, is 45. minutes.

New Moone the 7. day, halfe an houre past 6. in the morning, colde, drye, and windy weather.

The 10. day, the sunne riseth at 7. and 46 minutes, and setteth at 4. and 14. minutes.

The length of the Planetary houre is 42. minutes.

First quarter the 15. day, a quarter of an houre past 7. in the morning: The first part somewhat wet, the second part cold and drye.

The 20. day, the Sunne riseth at 8. and setteth at 4.

The length of the Planetary houre is 40. minutes.

Full Moone the 21. day, a little past 2. in the after:

Burton.

1618.

after noone, windy and wet weather, &c.

Last Quarter the 28. day, halfe an houre past 9. at night, windy, colde, and drye weather: It may be some fall of sleete or snowe, towards the latter part of this Quarter.

Nouembres Abstract.

VSe no Physicke except necessity bage thereto, and then by the counsell of the Learned. Use for your Dyet wholesome meates and drinks, you that are able, Exercise, and warme Clothing this moneth will doe well: Fatte your Haggas (you that haue them) for Bacon, &c.

December. 1618.

The first day, the Sunne riseth at 8. and 10. minutes, and setteth at 3. and 50. minutes.
The length of the Planetarie houre is 38. minutes.

New Moone the 7. day, at 1. and 22. minutes in the morning, drie and sharpe weather, if not frosts.

The 10. day, the Sunne riseth at 8. and 13. minutes, and setteth at 3. and 47. minutes.

The length of the Planetary houre, is 37. minutes.

A Prognostication.

First Quarter the 14. day, at 7. and 38. minutes at night, sharpe, and likely to be frecking weather.

The 20. day, the Sunne riseth at 8. and 11. minutes and setteth at 3. and 49. minutes.

The length of the Planetary houre is 38. minutes.

Full Moone the 21. day, halfe an houre past 10. in the forenoone, some fleetie weather, but drye weather afterwards, &c.

Last Quarter, the 28. day, more then 3. quarters of an houre past 3. in the afternoone, windy, fleetie, or snowie weather, &c.

Decembers Abstract.

Vse Physicke as in the moneth last past befoze: Keepe thy selfe from taking colde, and helpe to cloath the naked. Feede vpon good and warme meats, and impart with some to them that want. So G^{OD} shall blesse thee in the spending it.

*Da tua dum tua sunt, post mortem
tunc tua non sunt.*
